

App Platform

All your stocks, processes and planning
in one hand.

Efficiency and communication are among the most important pillars in logistics. Your customers always want the fastest solution and correct information. With increasing workloads and stricter customer demands, this is not always possible. You also have your own core tasks. But what if they could take certain steps themselves? What if they do not have to pass on their preferences, but register them by themselves? Then you would increase your efficiency and information possibilities in one go.

With Boltrics App Platform, it does not have to stay with “what if”. By giving your logistic partners access to a selective part of your processes, all parties can act on what suits them best. You set the parameters and the rest will follow.

Not just an application

The App Platform is one application center for all of your mobile devices. This module offers countless possibilities to both your company, your clients and customers. Make inventory reservations, timeslot bookings, verifications, and much more. No customization, but a complete platform for all your logistics processes. And therefore non-stop in development. Just like you are used to from Boltrics.

Always up-to-date with the latest technology

This platform is – like our other products – developed as a standard industry product. Based on our customers' input. We ensure that the connections are updated with each update and new items are added generically. This way, everyone benefits from each other's knowledge and you can always use the latest features.

Always and everywhere access for everyone on every device

With Boltrics' App Platform you are not the only one that has access to your logistic processes. Also your clients can, only if you allow this, get access to your system. This way they can, for example, book timeslots and drivers, or reserve stocks. You decide the degree of control and thus keep everything within your hand. Despite the device you are using at that moment.

Save a lot of time with real-time

Dynamics integration

No more paper forms. No Excel files that you need to integrate (manually) in your system. Forget time-consuming administrative activities. Everything you do in the App Platform is directly connected to your system. This way you will never do double work.

Prevent unnecessary costs and only pay for what you use

Forget about complex price agreements. Simply select the subscription with the expected number of transactions and pay one amount per month. Down- or upgrade when you expect a change in transactions. You only pay for the processes that are designed for you. Simple and clear.

Never pay too much

Adjust the number of transactions to suit your needs and select the bundle that best fits your organization and work processes. Did you make a wrong estimate? No problem, bundling can be adjusted each month.

Transactions

We define transactions as the total number of unique users per day, per administration, summed per month. For example: if one person uses the App Platform on Monday, this is one transaction.

If the same person uses the platform five times on the same day, this is still one transaction.

When person A uses the platform twice on Monday and four times on Tuesday, these are two transactions.

When person A uses the platform on Monday in administration X and administration Y, these are two transactions.

Finally: if person A uses the App Platform three times on Monday and person B four times on the same Monday, these are two transactions.

Starter bundles

Depending on your expected consumption, you can purchase a matching bundle. The larger the transaction volume, the lower the price per transaction.

Below, you can decide which bundle best fits your situation.

Number of transactions	Bundle	Extra tariff outside the bundle
0 - 100	€ 100	€ 2,00
101 - 200	€ 150	€ 1,70
201 - 300	€ 200	€ 1,50
301 - 500	€ 275	€ 1,30
501 - 750	€ 350	€ 1,10
751 - 1250	€ 475	€ 0,90
1251 - 2000	€ 600	€ 0,70
2001 - 4000	€ 750	€ 0,50
4001 - 7500	€ 1.000	€ 0,36
7501 - 12500	€ 1.500	€ 0,30
12501 - 20000	€ 2.200	€ 0,26
20001 - 30000	€ 2.750	€ 0,22
30001 - 50000	€ 4.000	€ 0,20
50001 - 75000	€ 5.500	€ 0,18

How does it work?

Use of the App Platform

The App Platform serves to support your work processes and complements your current Dynamics licences.

The use of the App Platform is subordinate to the license conditions of Microsoft and thus may not be used to reduce the number of Dynamics™ licenses (multiplexing).

Bundle amount

You can adjust the bundle amount monthly. Simply send your request to decrease or increase the number of messages to finance@boltrics.nl.

Bundling is based on the number of transactions. Transactions are defined as the total number of unique users per day, per administration, summed per month.

Additional transactions outside the bundle are settled as an extra rate in € per transaction and are invoiced the following month.

The bundle amount is invoiced monthly in advance, starting with the signing date.

Invoicing

Invoicing is done via a direct debit.
